SUMMARY

Aspiring Computer Science Engineering student with a passion for technology and a keen interest in software development. Eager to gain hands-on experience and contribute to dynamic projects, leveraging my programming skills and dedication to continuous learning. Seeking an opportunities to apply theoretical knowledge in a practical setting, develop technical proficiency, and contribute to innovative solutions in the field of computer science.

PROJECTS

Portfolio

- Created a visually appealing and responsive portfolio website using HTML, CSS, and JavaScript.

Student Enrollment System (Chat Bot)

- Developed a dynamic and visually appealing frontend application using HTML, CSS, and ReactJs for a Student Enrollment System.
- Implemented a ChatBot feature to facilitate seamless student data enrollment and display, enhancing user interaction and experience.

Weather App

- Created an interactive weather application using HTML, CSS, and JavaScript, capable of detecting weather information based on the user's current location using GPS.
- Enhanced user experience by incorporating features such as city-specific weather searches, providing detailed information on temperature, precipitation, humidity, and wind speed.

Restaurant Website Frontend

- Developed a responsive and visually engaging frontend application for a restaurant using ReactJS and CSS, ensuring a seamless user experience across devices.
- Implemented an intuitive user interface that dynamically displays restaurant data from a JSON file, showcasing a keen focus on design principles and user interaction.
- Integrated a user-friendly chatbot within the website, enabling customers to conveniently reserve tables at the restaurant, enhancing the overall accessibility and functionality of the platform.
